Backend and Database Technologies: Node.js, Express.js, Java, Python, RESTful APIs, MongoDB, MySQL

Authentication & Tools: JWT, Bcrypt, OAuth, Git, Github, Vercel, Netlify, VsCode

DEVELOPMENT EXPERIENCE

Full-Stack Developer Intern | Opsie Software Solutions | Mandaluyong City
February 2026 – June 2026

- Developed and maintained web applications using modern frontend and backend technologies, applying coding standards and best practices to ensure code quality, scalability, and maintainability.
- Collaborated with co-intern and product manager to translate business requirements into functional technical solutions and support the delivery of project objectives.

Project Lead and Programmer (Thesis/Capstone Project) | STI College Pasay-EDSA

- Led the planning, development, and implementation of the project, building interactive frontend features and backend functionalities using React, Node.js, Express.js, and MongoDB.
- Designed RESTful APIs, database schemas, and user authentication while coordinating team tasks and conducting functionality, usability, and compatibility testing to ensure project requirements were met.

FEATURED PROJECTS

Opsie Website – Business Operations Website | https://opsiesoftwaresolutions.com/
Full-Stack Developer Intern | February 2026 – June 2026

- Contributed to the development of a business website focused on workflow optimization, systems management, and operational efficiency.
- Collaborated with the development team to implement website features and translate business requirements into functional web solutions.
- Applied web development best practices to support maintainability, usability, and responsive design.

MusicQuestro – Music Game for Kids | https://musicquestro-web.vercel.app/
React, Vite, Node.js, Express.js, MongoDB

- Led the development of an interactive, story-driven web game featuring rhythm-based challenges, player progression, rewards, and achievements.
- Developed RESTful APIs, database integrations, and user authentication to support player profiles, leaderboards, and in-game data while contributing to frontend development, backend integration, and system testing.
